

# YEAR BOOK 2009

| Textile Institute of Pakistan

## INTRODUCTION

[www.tip.edu.pk](http://www.tip.edu.pk)

Textile Institute of Pakistan (TIP) was founded in 1994 under the aegis of All Pakistan Textile Mills Association (APTMA), with the prime objective of filling the much growing vacuum. The key objective was to provide professional education and training to a new class of professionals by honing their practical skills in addition to providing the necessary theoretical knowledge.

In order to run TIP, independently, APTMA created a trust under the name of National Textile Foundation (NTF). This foundation is the caretaker of TIP and looks after its financial and capital needs. Realizing the importance of Pakistan's export potential in the field of textile, the Trade Development Authority of Pakistan (TDAP previously EPB) played a significant role in the development of TIP in the shape of generous financial assistance through the Export Development Fund.

The campus houses all requisite facilities as per internationally acceptable standards such as an extensive library with an audio-visual room. The computer lab has a dedicated 2 Mbps internet facility and has a separate CAD lab equipped with specialized software related to the field of textile design, weaving and apparel. The science and textile laboratories, including spinning, weaving, knitting, wet processing and testing labs, have all been equipped with the specialized machinery for imparting hands on training to the students. A recently established fully functional apparel lab is the latest addition to TIP's technical laboratories.

Since its establishment, TIP has served the needs of industry to a large extent and is gearing up its resources to meeting its further requirements. So far, all TIP graduates have been taken up by the domestic textile industry with the exception of those who have gone abroad in pursuit of higher education.

To further strengthen the links between the industry and academia, TIP has recently launched Professional Development Program offering short courses in various specializations of textile and

management. TIP also organizes seminars symposia in conjunction with APTMA, the British Council Higher Education Commission and various other stakeholder.

With an independent charter granted by the Government of Sindh, TIP is authorized to award its own degrees under the recognition of the Higher Education Commission (HEC). TIP course content and syllabi were developed by faculty at the Clemson University, USA. TIP also has had various higher education links supported by the British Council, with the University of Manchester. This has helped TIP to adopt upgrade its educational standards according to the changing global industry and market.

Since the first batch graduated in 1998, TIP has so far produce 562 graduates. However there still exit a gap between the demand and supply of skilled human resource needed for the growth and development of the textile industry, which a major share in the total earning of Pakistan's export. At TIP student is exposed to an environment where he/she is given the opportunity to comprehend and analyze different aspects of global, socio-economic and environmental issues, in addition to sports, cultural and social activities organized by the Textile Institute Students Forum.

In this modern era of rapid evolving technology, it is imperative for any nation to stay in touch with the latest technological trends. Bearing this in mind, TIP has recently established the Textile Research and Innovation Centre (TRIC) under its wings. This would help Pakistan's textile sector innovative new, products and become competitive in the global race. The vision of TRIC is to foster genuine leading-edge research linking the industry and other institutions within Pakistan and abroad and would provide a new dimension to textile education in Pakistan. The initial focus of TRIC is on promoting Advanced Materials Research such as technical textiles and nanotechnology and to incorporate such research with the existing technology available in the Pakistan's textile sector.

# APPAREL MANUFACTURING & MERCHANDISING

BBA Hons

Our BBA (Hons) in Apparel Manufacturing and Merchandizing program was created after a thorough analysis of the needs in our industry and its future development trends. It is a combination of business and apparel courses. This program has been created to encompass all important elements of a successful apparel manager: procurement, quality, production, product development, marketing, management, merchandizing, finance, human resource management and sales.

The program ends with a thesis project in specialized apparel topic, giving our graduates an in-depth understanding of research, analysis, decision making and problem solving.
